

## Monthly Activities Report for March

Date: 27<sup>th</sup> April 2021

Country: Myanmar

The violence in Myanmar are continues happening and with hundreds of lives being lost since the civil uprising opposing the military regime that overthrew the government on Feb 1, 2021. Myanmar people are living in the nightmare because according to the data 751 people are had been killed, 4473 people are arrested, 3431 people are still detained and 1159 people has warrants out till today in the whole country. Military strategy is cutting of civilian internet to try and stop people from protesting. Now, the only internet service available in the country is the fiber internet line. Mobile data has been shut down. WIFI broadband services have been cut off since April 1. All the public WIFI services have been cut off. The only remaining internet services, from the fiber line, is not available every day from 1 am to 9 am for almost 3 months. All the banks are closed because the staffs are doing CDM movement. People are survived till today and they are very hopping to get the Federal Democracy for Myanmar.

The situation is getting worse day by days. Even if you are not protesting, you can be detained, beaten tortured, humiliated, dehumanized anytime and anywhere, even inside you home. Doesn't matter if you stay home or go out to protest, you can get killed anytime without any valid reason due to random gunfire. The scariest things are, if someone is arrested at night, most likely his or her dead body will be returned the next morning. In some cases, they won't even return the body.

In the beginning of the coup, the Myanmar people hold out very high hope for international help. However, this recent days and weeks people are getting hopeless and they are started preparing for themselves. In Kayah State, 3 people had been killed by military during this Spring Revolution. We do have demonstration every day in Kayah state. The INGOs staffs and CSOs staffs are not able to go to the files due to the security reason. The KNPP is cooperating with the NUG (National Union Government). The NUG is in parallel government for the military group. It means the KNPP and the military can fight the war anytime in the Kayah State because they cooperated with the NUG. So, the communities' people in much worries and they are preparing for the bomb-proff shelter within their backyard. And also, people are trying to store the foods as much as they can. So many of youths went to KNPP areas to get the military training. Hope we can survive during this crisis.
